### Special issue of NDT.net - „Acoustic Emission“ Final Call for Papers

Ladies and Gentlemen:

The members of the Editor Advisory Board of the journal "NDT.net" are calling for papers in the field of „Acoustic Emission“. The papers are being collected for a special issue of NDT.net that will be published in fall of 2002. The journal NDT.net is a monthly electronic journal ([www.ndt.net](http://www.ndt.net)) dealing with non-destructive testing.

Papers are welcome from all fields dealing with acoustic emission. Some of the advantages for the authors are :

- publication of recent results with short delay due to a rapid peer review process
- direct access to the journal via internet from all over the world
- easy formatting (final formatting is done by the publisher)
- publication of colored and animated graphs of high quality without fee

Authors should contact the address in the header no later than **May 31<sup>st</sup>, 2002** giving the title and the names of all authors. The article should include no more than eight printed pages (letter or DIN-A4) and fewer than ten figures. There are no formatting restrictions except that the final article should be sent in WinWord or Portable Document (PDF) format.

Deadline for the submission of the article is June 30<sup>th</sup>, 2002.

Sincerely yours,
