PREFACE

The 3rd International NDT Symposium and Exhibition was held in the İstanbul Technical University, Süleyman Demirel Culture Center between 17 - 19 April 2008.

Importance and application fields of the NDT methods have been continuously increasing. In Turkey, internationally recognized training and certification activities started at the end of 80's, and accreditation studies at the end of 90's in cooperation with some EU countries. However, there is still a need for establishment of a national system and control mechanisms.

Within the frame of this event, NDT experts and companies/institutions from Turkey and abroad came together to exchange their technical experience and improvements, and to establish new contacts or to tighten the existing contacts.

We hope that this book will be useful to the colleagues working in the NDT field.
