DURR NDT selling Flat Panel Technology

We have been approached by our customers, asking for a flat panel solution to be integrated into our imaging software D-Tect.

DURR NDT therefor now offers two different panel sizes for a wide range of applications. Due to specially designed "quick-mount-frames" the panels are protected from damage from both high kV radiation and rough handling.

HD-CR 35 NDT still benchmark

The HD-CR 35 NDT is still benchmark in computed radiography if resolution is considered. More and more customers trust the quality of our product hand-made in Germany.

HD-CR 43 NDT - 25,000 IP-cycles - guaranteed!

The unique transport mechanism of the HD-CR 43 NDT allows us to provide you a guarantee of 25,000 cycles per IP without a single scratch on the screen.

Cost per image thus reduces to a couple of cent only!

The clever design of the unit ensures, that cooling air is guided through an air duct, cooling just the eraser-LED's. The optical system will thus remain clean and functional all time.
