M2M newsletter: new format, new frequency, now monthly.

Starting with the new year, M2M is pleased to reintroduce its newsletter. You will now receive monthly information and news about us. Follow us and share it on Twitter.

Finalization of the first automated SAUL inspection of composite parts.

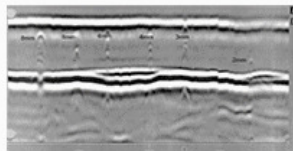

SAUL

Surface-Adapting ULtrasound

The first industrial application of the SAUL method is being finalized at the customer site. The application is dedicated for composite inspection. The implemented solution is fully automated: 1 probe, 1 software, 1 file, handling 250+ geometries. M2M will welcome you for a SAUL demonstration during the JEC composite show (see below).

Check out our technology page [here](#).

TestPEP project is ongoing.

TestPEP is a European project started in February 2010, aiming to develop an automated solution for the inspection of welded joints in plastic pipes. This 36-month project is part of the European Union 7th framework program. It involves 15 organizations from seven countries, including M2M from France.

M2M expands!

M2M has expanded its facilities in Les Ulis, France, which are now welcoming close to 40 employees. Along with growth in most departments, M2M production is getting ready for intensive workload. With a large conference room and soon robot-controlled scanning possibilities, M2M aims to provide more training and feasibility testing.

M2M will be attending JEC 2013

JEC EUROPE 2013 is the leading venue for composite industries in Europe and all around the world. It attracts more than 250,000 professionals from over 100 countries.

You are invited to attend a SAUL demonstration dedicated for composite inspection. We will be attending and welcoming you on booth Y28.
